

There are a lot of things that can be made from reindeer-horn. Here follows some suggestions.

### Woggle

Start to saw off a piece of reindeer-horn. Boil this piece in a pot for about 30 minutes, this will make it easier to make the hole for the scarf. Use your knife and after that the round-file to make the hole for your scarf.

File and polish the edges using file and sandpaper and to make the surface smooth and nice, polish with sandpaper and steel-wool.

If you want to, then you can decorate your woggle with a patrol-sign or any other scout-signs.

### Ring

Saw off a piece of horn. Use one of your own rings to measure the size. The core in the horn shouldn't be too wide. Drill a hole in the middle of the core and then use your knife to carve out the hole to the correct size. You can also use a round-file. To shape the outside of the ring you use a flat-file. When you are satisfied with the shape, you use sandpaper and steel-wool to get a nice finish.

### Key-ring

Saw off a not too small but at the same time not too big piece of an end / point of the reindeer-horn. File and polish the edges, polish the surface with sandpaper and finally steel-wool. This will give a nice and smooth surface, the hole for the ring or the string do you make with a drill.

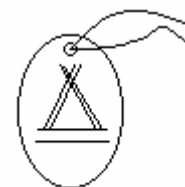

### Buttons

Take a round and not too thick piece of the reindeer-horn. Begin to saw off a thin slice from one off the ends of the piece so you get a straight cut through your piece. To make the holes you use a drill, try to drill as parallel as possible. After this you saw out the buttons with a saw. As a final touch polish the buttons.

### Patrol-symbol / Camp-memory

Take a piece of reindeer-horn and do what you want with it. Put a string in it and hang it in your scout-shirt.

### Earring / Necklace

If you saw out a slice of reindeer-horn then you can make an Earring or a Necklace of it. Examples and inspiration of how to do this can be seen at our stand in the handcraft-village.
